

Springboard After School:
A Smarter After School
 Enrollment Options and Prices

Springboard's full program starts at the end of your child's school day goes until 6 PM or later, Monday through Friday and during most school closings. You can sign up for many options. Call or visit online to confirm pricing and schedule.

The Springboard Schools and the non profit Springboard Foundation are dedicated to maximizing the potential of each child. Springboard schools include Early Children Development schools ages one through five, and Springboard After Schools grade Kindergarten through Grade 8. Springboard was created recognizing most parents cannot afford private schools or expensive tutoring. Springboard keeps its prices and costs very low for families.

*"Our kids will lead our country and neither can afford to fall behind the world."*TM

A Smarter After School

- Designed By Educators • Taught By Educators

A whole new *BALANCED* approach to after school; Giving kids, parents and teachers *what they WANT and what they NEED!*

Why Is Springboard so Important Today?

Children today need a place after school that's safe, has sports, fun clubs and enrichment programs AND provides crucial professional academic help for children.

Springboard insures that children understand their school work each day and do not begin to fall behind as they pass through each grade.

-----This is what Springboard is all about.-----

Transforming After School

Springboard was founded to level the after school academic playing field by providing children in public schools some of the same benefits children in private school receive, but at extremely low cost.

Research and surveys of Springboard's families and schools has proven that after school instruction coordinated with school-day teachers and parents can increase academic performance.

HOW DO PARENTS FEEL?

94% rated the program "excellent" or "good"

97% said homework was completed more often

Nearly every parent said there was less stress at home

"AJ and I fight about school work almost every night. Thanks to Springboard, last night was the first peaceful night in my house in a long time." *Parent of 6th grader*

"Marcus aced his math test last week, thanks mostly to Springboard. Carly sent me away when I came to pick her up early. She was having too much fun!" *Parent of 5th grade girl and 6th grade boy*

A Typical Springboard After School Day

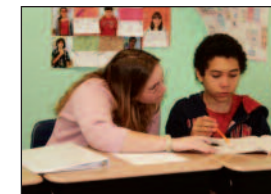

First, we meet, relax and plan

In consultation with your children's school-day teachers, our teacher's monitor outstanding and upcoming work for each child. We meet in a circle to review rules and make connections. Diagnostic assessments are used to plan academic, physical and creative interventions

Next, fun clubs & enrichment

Springboard is successful because kids want to attend. Kids need time to relax and an opportunity to get to know the staff and one another. Each day, students spend a portion of their after school day in activities, including after school clubs, sports and games and in our recreational facility known as "The Den" having fun with Wii, video games, music & games.

Then, Academics and study time

Teachers assess how well prepared your child is for HW, check HW for accuracy, and provide immediate feedback to ensure that HW is fully understood. When HW is complete, we provide additional instruction to help your child get ahead. We provide parent reports on diagnostic results and academic progress.

SPRINGBOARD INTENSIVE

One very common academic theme Springboard sees with grades 5 through 8 are kids that have fallen significantly behind academically from years of academic neglect inattention. Students fall victim to the "cumulative effect." This happens when students fall behind because of knowledge and concepts missed or not understood through the grades and are unable to catch up. Each year their inability to receive the support and help they need continues to create a widening gap. Springboard Intensive provides students with the small group academic support that they need to catch up to their peers.

Licensed specialists in areas such as math and science spend time with your child to make sure that they succeed.
