“Totally Awesome Summer” ...and that’s just what the parents are saying!

Summer @ Springboard

We have an amazing summer planned and we can’t wait for it to begin! We understand how important it is for your child to have a stress-free, enriching and brain engaged summer. That’s why, based around our weekly themes, we have a calendar chock full of exciting and educational activities. And we’ll spend at least 1 hour a day of focused (and fun) academic time and summer reading. Along with Academics, our summer schedule includes swimming, field trips, special in-house visitors, arts & crafts, sports, and so much more.

We understand that you’re not looking for an afternoon babysitter. That’s why we hire teachers who are trained and experienced specifically to understand the needs of school age kids. Part teacher, part activities coordinator, part friend, our staff know how to provide just the right level of guidance and instruction while always respecting your child’s own needs. Our teachers return year after year to our summer program because they have as much fun as the kids!

Our Weekly Themes:

May 31 - June 3: Getting to Know Me!
During this Self Awareness Week, we’ll learn about personality differences through self-exploration and also explore how we grow physically and mentally. We’ll plant seeds and watch our flowers grow all summer!

June 6 - June 10: Wacky Weather
We’ll take a close look at how weather affects our everyday lives as we follow the weather for the week. We’ll learn about temperature, humidity, cloud formations, wind, and weather meters and even create our own barometers!

* Field Trips - We take field trips throughout the summer and as details are available we will post them online on the Rock Ridge Elementary page of www.springboardafterschool.com. If your child attends a field trip, we will automatically charge your account \$7.

June 13 - June 17: A Tropical Paradise
Join our volcano exploding contest as we learn about how and why volcanoes erupt! We’ll also go under water to explore sea creatures and tropical oceans

July 20 - June 24: Puppet Parade
Lights, Camera, Action! We’ll take you from page to stage as we create and perform our own puppet plays. We’ll explore improvisation, acting, scenery, props, and costumes as we collaborate on this student production.

June 27 - July 1: Kids in the Kitchen
Our most popular elective is back this summer! Our chefs will be cooking calzones, tacos, blueberry pie, ice cream and more. Anyone hungry?

July 5 - July 8: Happy Birthday America
Come explore the Boston Tea Party and Paul Revere’s midnight ride as we sign our own Declaration of Independence and celebrate our history!

July 11 - July 15: We Can Work It Out!
It’s all about being part of a team. We’ll shoot through team building exercises straight through to learning new sports. We’ll work together, play hard and have fun!

July 18 - July 22: Teepees to Hogans
Learn how to live like an American Indian as we build shelters, rain sticks, gods eyes and more. We’ll also explore Indian poetry, painting and learn about the different tribes and customs.

July 25 - July 29: Music Makes the World Go Round!
Join us as we explore music from around the world, both old and new. We will even make our own instruments from recycled materials!
